PPM 161: Supporting Children and Students with Prevalent Medical Conditions (Anaphylaxis, Asthma, Diabetes, Heart and/or Epilepsy) in Schools

eLITE's MedPlan will provide

- the roles and responsibilities,
- medical docs/plan of care
- awareness of prevalent medical conditions.

This automation of the flow of medical condition information ensures the

- facilitating and supporting of daily/routine management
- emergency situation response
- increased awareness within the school and school board.

MedPlan meets all the guidelines with PPM161 and provides for an effective and efficient mechanism for ensuring the safety of students.

Created By: Diane Williamson on: 2018.10.17 | Last Edit By: Diane Williamson on: 2018.10.17 | Status: Draft | Finalized on:

KNOWN LIFE-THREATENING TRIGGERS

Food(s): Peanut | Epinephrine Auto-Injector(s) Expiry Date (s): 15 Oct 2019

Insect Stings

Other

Dosage: EpiPen Jr. 0.15 mg EpiPen 0.30 mg

Previous anaphylactic reaction: Yes (Student at greater risk) No (Has had NO anaphylactic reaction)

Any other medical condition or allergy?

DAILY/ROUTINE ANAPHYLAXIS MANAGEMENT

SYMPTOMS: A STUDENT HAVING AN ANAPHYLACTIC REACTION MIGHT HAVE ANY OF THESE SIGNS AND SYMPTOMS:

Skin system: hives, swelling (face, lips, tongue), itching, warmth, redness.

Respiratory system (breathing): coughing, wheezing, shortness of breath, chest pain or tightness, throat tightness, hoarse voice, nasal congestion or hay fever-like symptoms (runny, itchy nose and watery eyes, sneezing), trouble swallowing.

Gastrointestinal system (stomach): nausea, vomiting, diarrhea, pain or cramps.

Cardiovascular system (heart): paler than normal skin colour/blue colour, weak pulse, passing out, dizziness or lightheadedness, shock.

Other: anxiety, sense of doom (the feeling that something bad is about to happen), headache, uterine cramps, metallic taste.

Avoidance of an allergen is the main way to prevent an allergic reaction.

• Easily identify prevalent life threatening medical conditions

• Capture all relevant details surrounding the condition
